

# MICROPHONE

The Jacques MWM-7C1 microphone is a small device that is ideal for applications where covert and other monitoring is required. Two models of this device are available, in both stainless steel and plastic.

One model includes a covert microphone and panel. The other includes a microphone, button, LED to indicate when recording, and a panel.

This microphone provides crystal clear voice monitoring which is able to be recorded onto a third party NVR, DVR or other recording device.

## FEATURES

- Balanced audio output
- Single ended, audio output, for RCA type connections
- 1 relay output each with change over contacts
- LED indicator
- Available as two options (see across)
- Covert operations
- Push To Talk operations
- Manual on/off toggle operations
- Optional connection for external electret mic or dynamic mic

## APPLICATIONS

- Property transfer stations
- Non contacts visit areas
- Padded cells
- Interview rooms
- Meeting rooms
- Public address
- Childcare centres
- Covert monitoring
- Audio input to any IP camera and encoder
- Audio recording on NVR, DVR or other recording device
- Any application where monitoring of voice communications is required

## SPECIFICATIONS

### MWM-7C1 - Stainless Steel

Dimensions: (116 x 70 x 50) mm  
without terminating connectors  
Weight: 0.25 kg

### MWM-7C1P - Plastic

Dimensions: (116 x 77 x 50) mm  
without terminating connectors  
Weight: 0.20 kg

Power Source: (12 - 32) V d.c. @ 100mA  
Power Consumption: 2.5 W

Activation Options:

PTT (Push to Talk),  
Toggle, muted on powerup  
Toggle, Active on powerup  
Always Active  
Green LED

Activation Indication:

Green LED

Audio Characteristics

Output Freq.: 160Hz - 16kHz  
Audio Output Spec: -4 dBu, 600 ohm, electronically non-isolated, balanced, or unbalanced

Relays & Indicators

No. of Relays: 1  
Relay output: NO/NC type 24 V @ 2 A max
