

## JACQUES INTEGRATED IP VIDEO INTERCOM SYSTEM

The Jacques 650 Series Integrated Communications System featuring the IP Video Intercom is ideal for multi-dwelling residential applications. Our stylish designs will provide you with an exceptional apartment communications system and can fully integrate with other IP systems installed in the building.

The Jacques Apartment system is a fully networked solution with the ability to connect to an unlimited number of intercom stations. The 650 Series System is proven and reliable and will create a networked system that is extremely flexible.

### Video Intercom Monitor Station Features

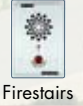

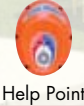

- Unlimited number of monitor stations
- Easy to use 7" inch intuitive colour touchscreen design
- Unique Feature - Intercommunication between apartments
- Message facility whilst away
- World class styling, with architectural colour design matching
- Quick, simple installation
- Snapshots taken and stored when a call is placed
- USB port to download any snapshots that are taken
- Handsfree and handset models available
- Wall or desk mounted design

### Apartment Building features

- IP Video Intercom for individual apartments
- IP Video Intercom Entrance Stations for added security
- Help Points for car parks, pool areas, outdoor spaces
- IP Lift intercoms including cable extender module
- Uses standard Ethernet networks and all devices connect directly to the network
- Firestair intercom solutions
- Integration via High Level Interface (HLI) with other systems including CCTV, access control, BMS and SMS

### Video Intercom Entrance Station Features

- Unlimited number of entrance stations
- Attractive Slimline design
- 3.5" LCD colour monitor
- Wide angle camera - minimum 75°
- Backlit keypad or single button
- Door release
- Lift control
- Additional Ethernet port for third party IP devices
- Vandal, insect and weather resistant
- Multiple simultaneous communication - all entry points can be used at one time

One of the main benefits of the Jacques system is its ability to share a network with other systems including CCTV, access control, BMS and SMS. This offers a significant reduction in installation time and costs.
