

Overview

The Jacques to Inner Range High Level Interface (HLI) allows the Jacques Integrated Communication System (650 series) to send events to the Integriti Security Management System for control at a security workstation. Jacques intercom devices deployed throughout a site can be linked with doors, parking gates, and cameras within the Integriti Security Management System. Security personnel can then effectively respond and manage any incoming intercom calls and other Intercom events directly from the Integriti graphical user interface (GUI) providing both a streamlined workflow and circumstantial awareness.

Functionality

The below listed intercom functionality is available at the Integriti GUI

Intercom Functions

- Make intercom calls
- Receive intercom calls
- Terminate intercom calls
- Forward intercom calls
- Place intercom calls on hold
- Pending intercom call notification (call queue)
- Adjust intercom call volume
- Control music streaming function of intercom
- Covertly monitor intercoms
- Remote or isolate intercoms

PA Functions

- Select PA zones for broadcast
- Make/terminate PA calls
- Group PA zone calling
- Soft button PA system Push-To-Talk

Relays & Events

- Trigger alarm - intercom event
- Trigger alarm - activate intercom associated 3rd party CCTV
- Trigger alarm - activate intercom associated 3rd party CCTV along with audio from intercom
- View CCTV stream from Jacques video intercom device
- View CCTV stream along with audio from Jacques video intercom device
- Activate door/gate relay

Diagnostics & Reporting

- System controller connection status
- Monitor endpoint status change (online/offline/alarm)
- Site specific information distribution
- Events logging
- Alarms and alerts logging

Graphical Maps

- Display Jacques Intercoms on Graphical Maps
- Dynamically change the display of Jacques intercoms based on their current status
- Control Jacques intercoms from Graphical Maps
- Automatically zoom in on intercoms based on alarm trigger events

Alarm Management

- Automatically control intercoms based on alarms received from 3rd party system
- Automatically control doors, areas, relays etc. based on events from Jacques system
- Automatically control compatible 3rd party systems (e.g. CCTV) based on events from Jacques system

Additions

- Multisite operation
- Historical logging of intercom events
- Simulate button press on intercom
- Soft button intercom Push-To-Talk

Versions

Integriti version 16.0.2 - Jacques Plugin version 1.6
Jacques system server 7.46
