

## Overview

---

The Jacques - Vivi integration allows for event triggers such as emergency buttons to display seamlessly on Vivi graphic screens.

Vivi offers wireless screen mirroring and digital signage devices designed for the education market. The integration allows Jacques school system to trigger messages to Vivi emergency screens when an emergency button is alarmed.

## Features

---

Trigger simultaneous visual and audio emergency messages

Dynamic selection of school zones

Suitable with Jacques physical and GUI-based emergency buttons (including JAS QButtons).
